

- Download files from Github

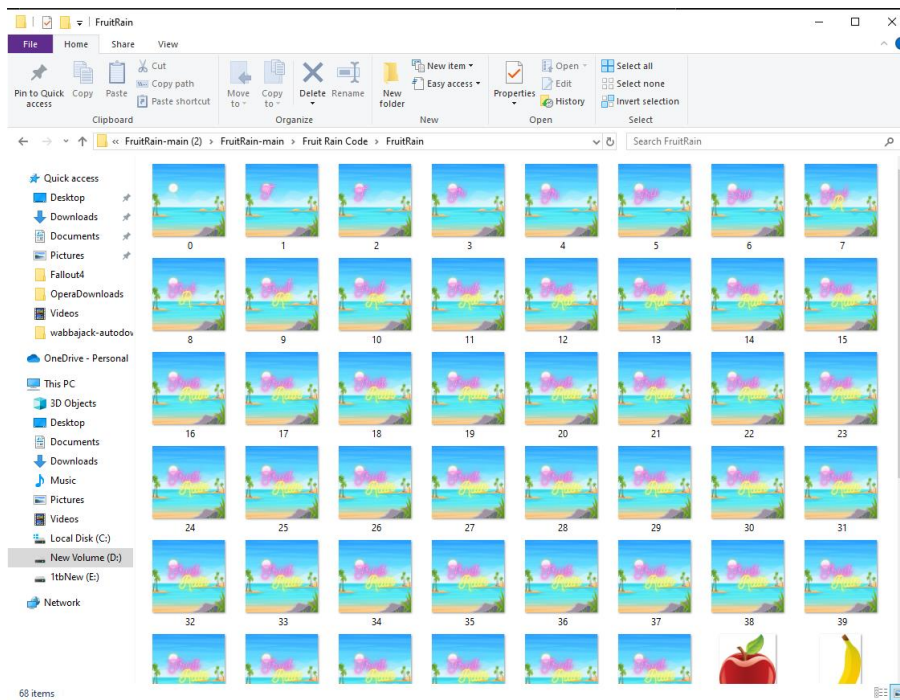

- Extract the files to a desired folder

- Open the extracted folder and proceed into the "FruitRain-main" folder

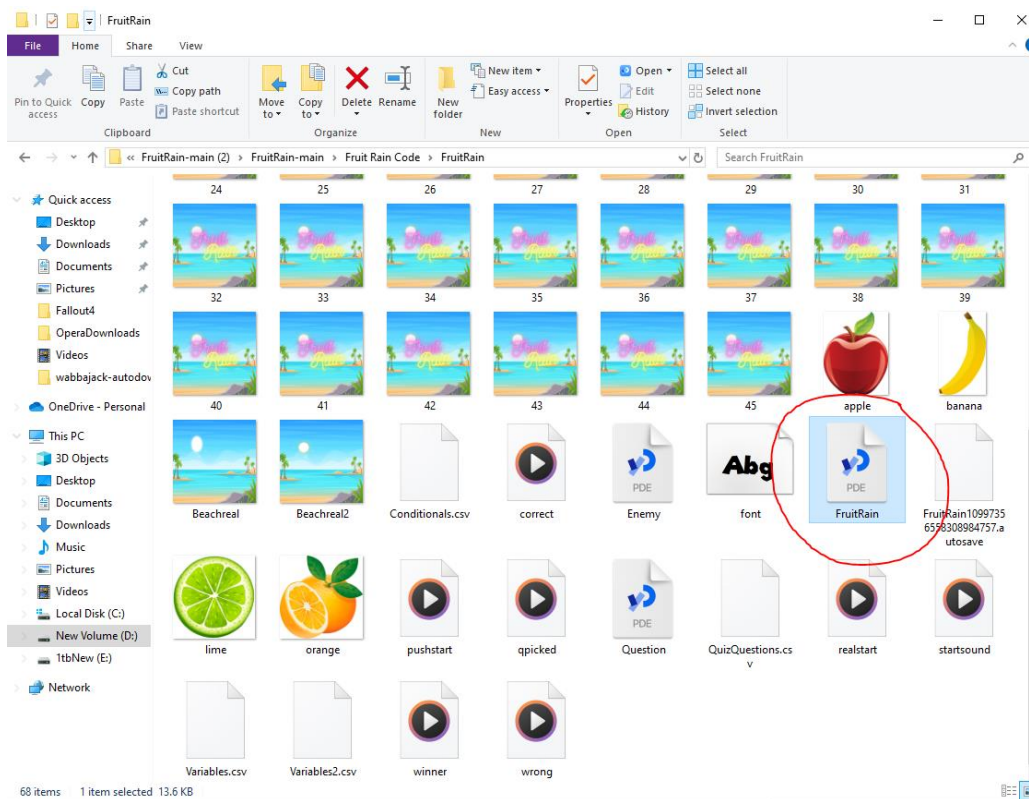

- Go into the "Fruit Rain Code" folder and proceed into the "FruitRain" folder

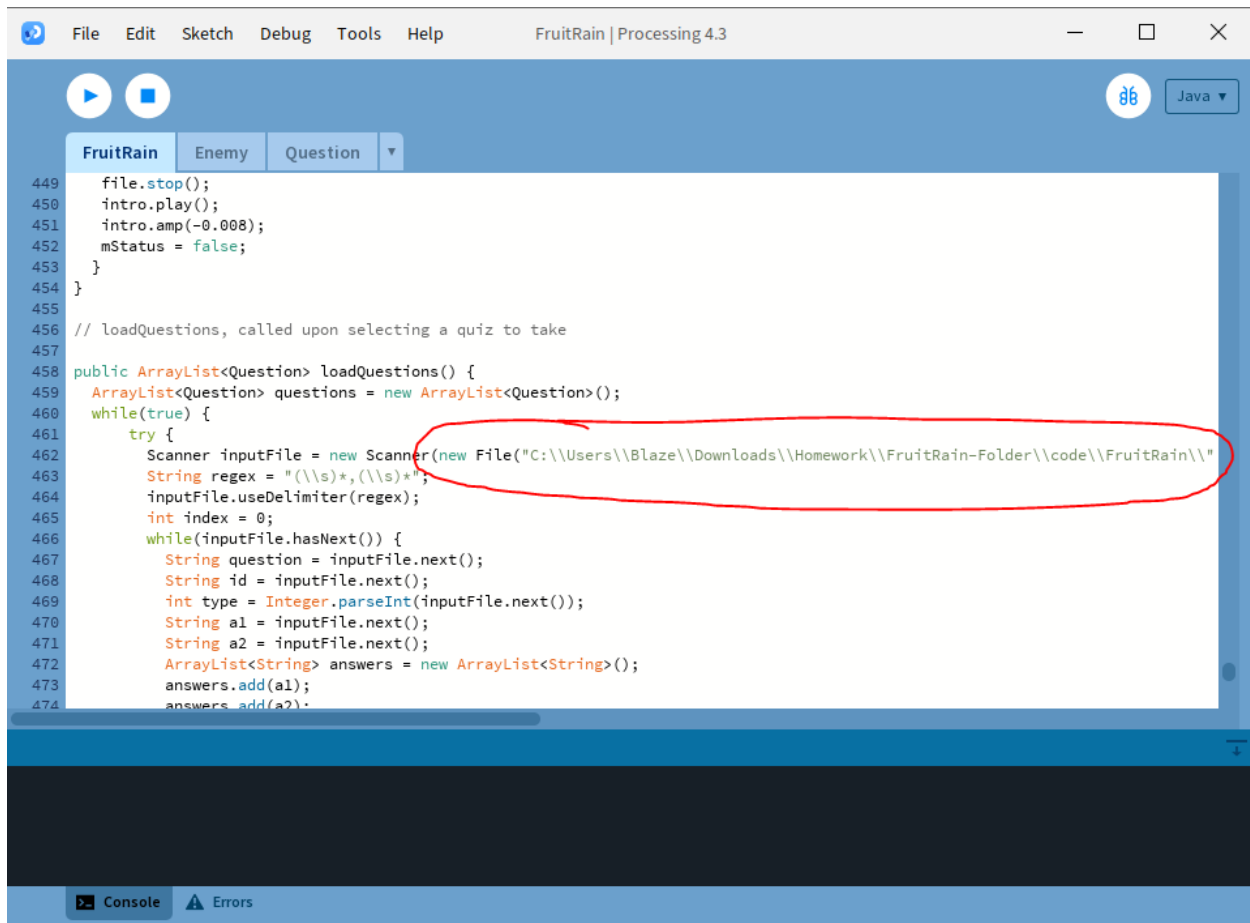

- Copy the file path of the current folder

- Scroll down in the "FruitRain" folder until you find the "FruitRain" PDE file and open it

- Scroll down to line 462 and replace the file path that is already there

```

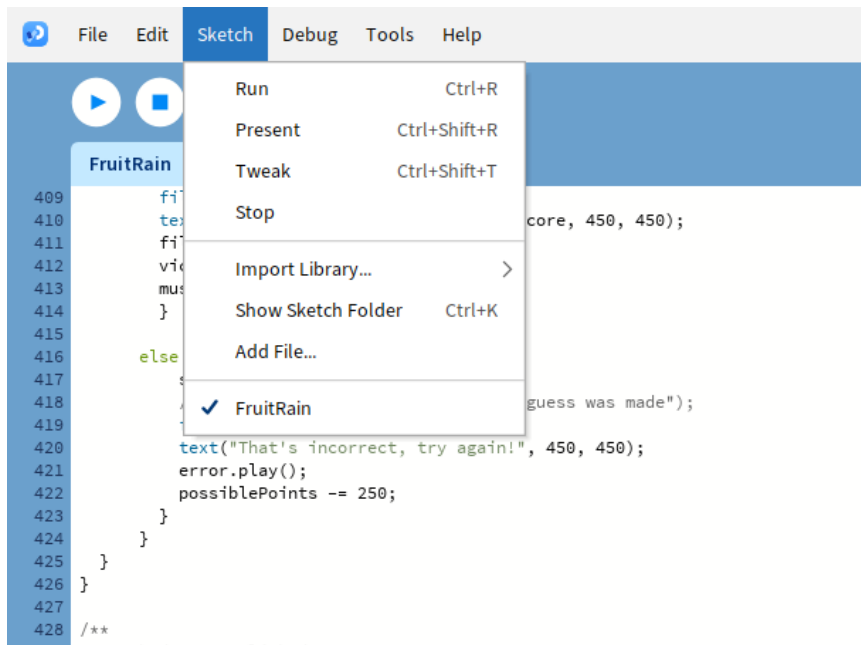

449     file.stop();
450     intro.play();
451     intro.amp(-0.008);
452     mStatus = false;
453 }
454 }
455
456 // loadQuestions, called upon selecting a quiz to take
457
458 public ArrayList<Question> loadQuestions() {
459     ArrayList<Question> questions = new ArrayList<Question>();
460     while(true) {
461         try {
462             Scanner inputFile = new Scanner(new File("C:\\Users\\Blaze\\Downloads\\Homework\\FruitRain-Folder\\code\\FruitRain\\"
463             String regex = "(\\s)*,(\\s)*";
464             inputFile.useDelimiter(regex);
465             int index = 0;
466             while(inputFile.hasNext()) {
467                 String question = inputFile.next();
468                 String id = inputFile.next();
469                 int type = Integer.parseInt(inputFile.next());
470                 String a1 = inputFile.next();
471                 String a2 = inputFile.next();
472                 ArrayList<String> answers = new ArrayList<String>();
473                 answers.add(a1);
474                 answers.add(a2);

```

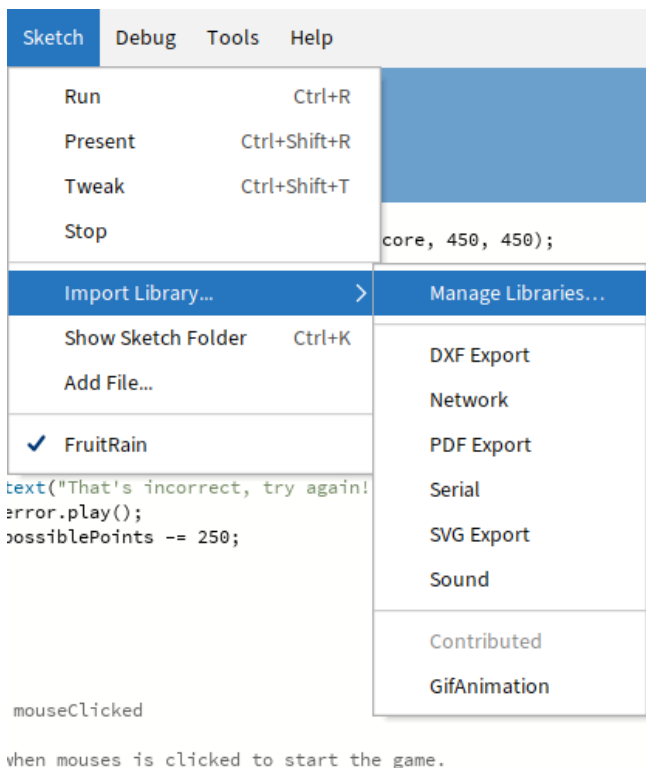

- After pasting add another back slash to each one present in the file path as well as, two at the end

"D:\\OperaDownloads\\FruitRain-main (2)\\FruitRain-main\\Fruit Rain Code\\FruitRain\\"

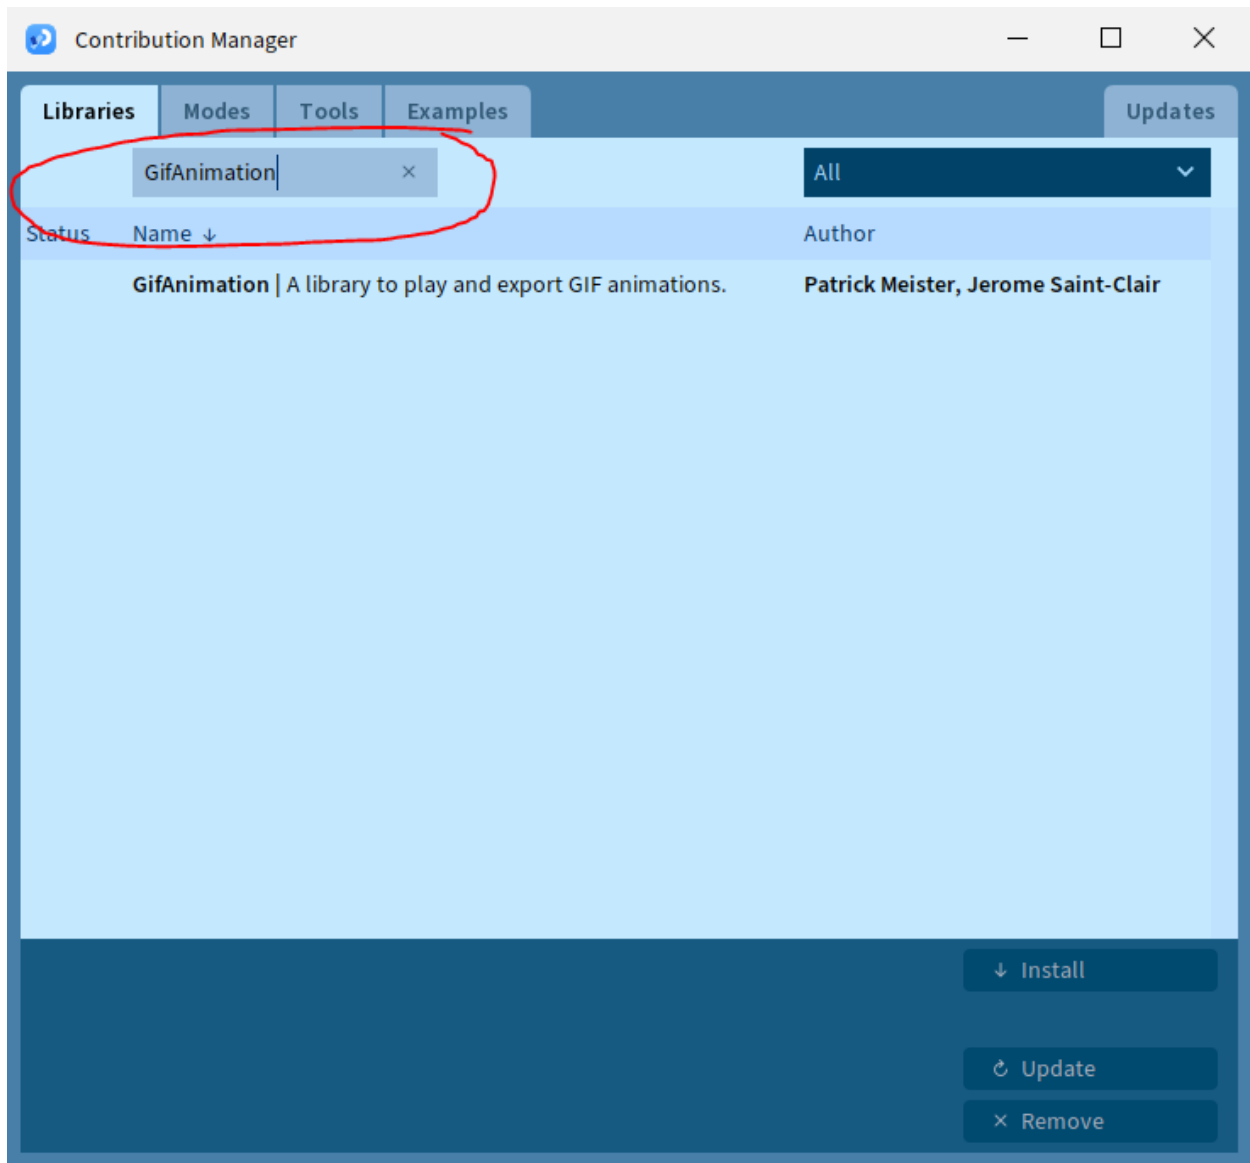

- Now press the “Sketch” tab at the top

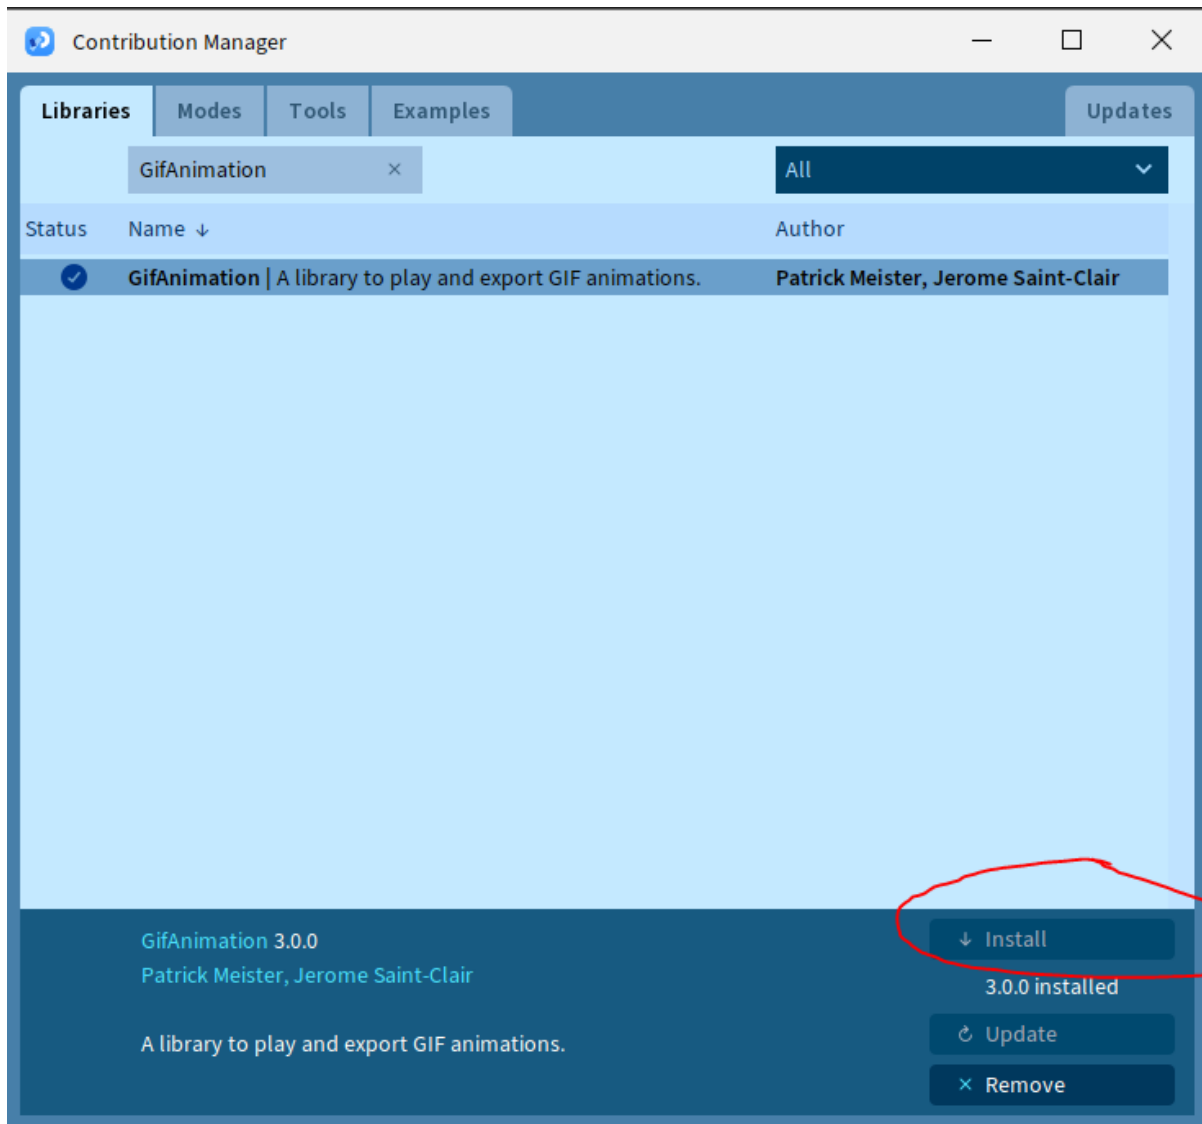

- Click the “Import Library” tab and select “Manage Libraries”

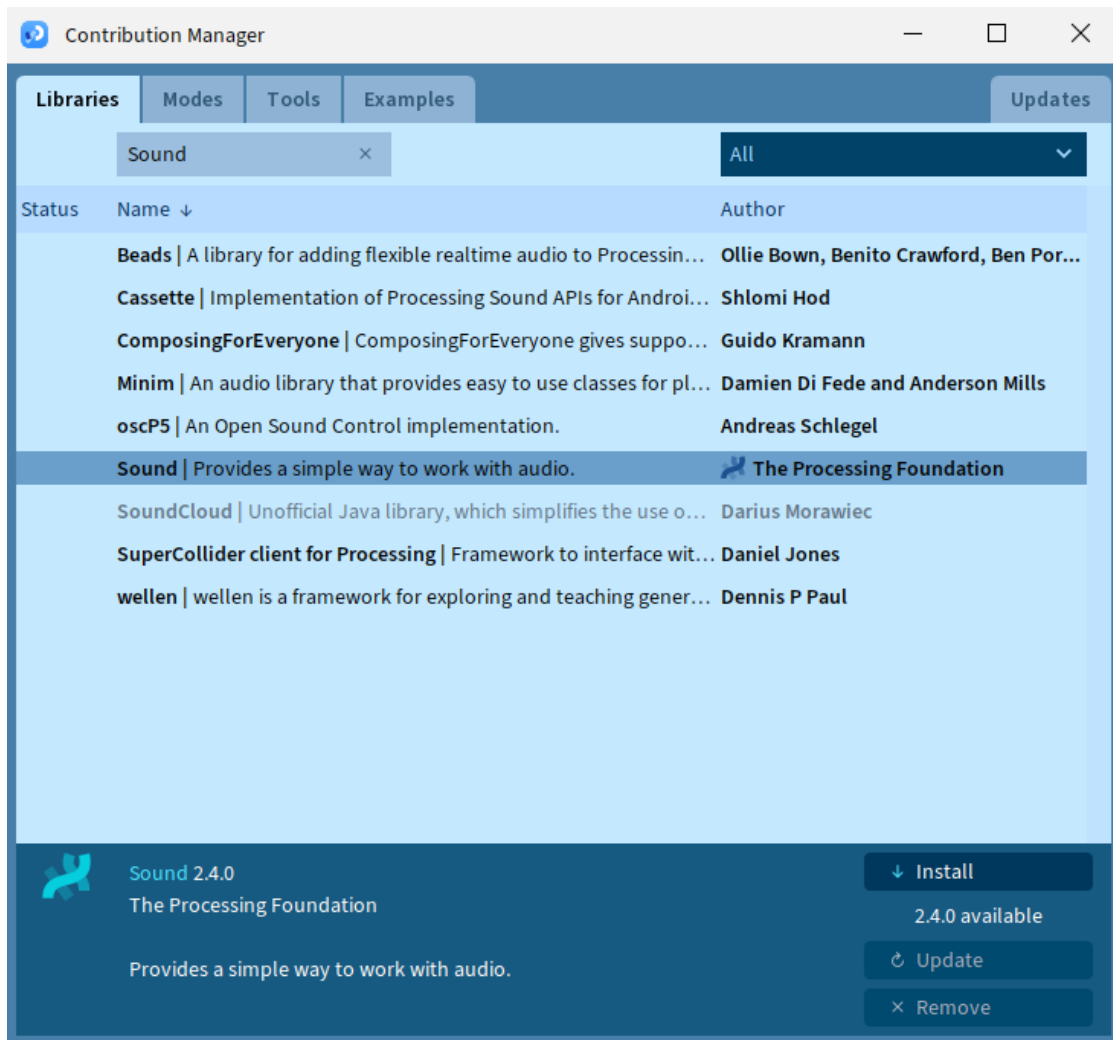

- Now search “GifAnimation” in the search bar

- Click the only option and select the "Install" button in the bottom right

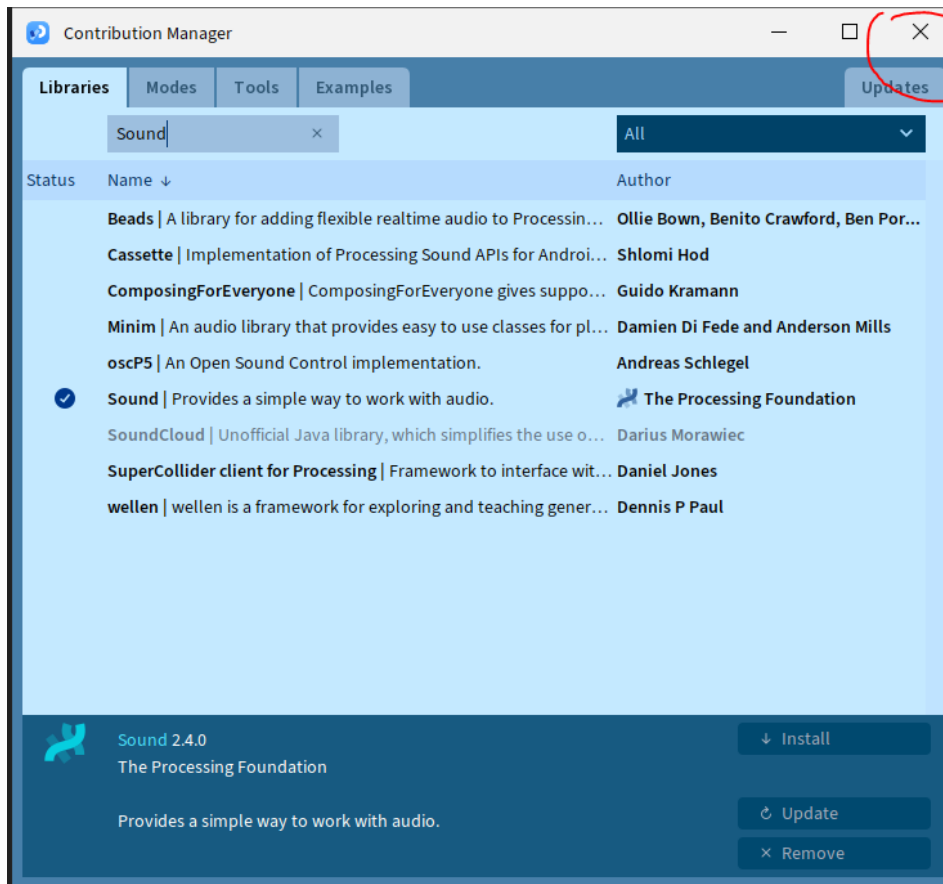

- After it finishes installing, search "Sound" in the same search bar and select and install this option

- Exit this window after it is finished installing

- Now run the game to ensure it works correctly
